Minerals

Improve your herd's reproductive performance with **MULTIMIN EVOLUTION!**
All the advantages of Multimin, but now with more zinc!

Containing copper, manganese, selenium and zinc, Multimin Evolution has 50% more zinc and the highest trace mineral content of any other injectable trace element product in NZ. When given 30 days before mating, zinc contributes to improved fertility, pregnancy maintenance and development. NZ research[^] has proven these trace elements contribute to 3.3% higher in-calf rates and cows conceiving 3.4 days earlier.

Your pets this holiday season

Look after your furry friends this festive season with these tips, tricks and great deals on toys and more.

Vaccinations

Heading away for the holidays? **Make sure your pets are up-to-date with their vaccinations** before checking them into their kennel or cattery, or socialising with other animals.

Medication

Avoid the last minute rush and **stock up on their medicines** before you need them.

Watch their consumption

Don't let your pet overindulge or scavenge food, scraps, treats or non-consumables (such as wrapping paper).

Space

Just like us, **our pets need space and time out from others.** Busy environments can be stressful on animals (and people).

Pet gifts

Treats offer great enrichment for pets. Make sure you stick to **daily recommendations** and **choose toys that will not break down** and be consumed.

Topflite Hound advent calendar for dogs
